

Deviano Christian

Full Stack Software Engineer

I BUILD SOFTWARE YOU CAN ACTUALLY FEEL.

FAST · CLEAR · NATURAL · RELIABLE · ALIVE · USEFUL

SELECTED WORK

Janova

Turns messy project workflows into something people can actually use

FaS-Track Subsoil

Turns continuously changing field data into software people can understand and act on

BLE IoT Configuration App

Turns a complicated device-config process into a simple mobile flow

Smart Halter

Turns imperfect sensor data into useful information

SKILLS

Frontend: React, Next.js, TypeScript, Vite, HTML/CSS, Responsive UI

Mobile: Flutter, Dart, Kotlin, Jetpack Compose, Android

Backend: Go, NestJS, Node.js, REST API, WebSocket, Auth

Data: PostgreSQL, PostGIS, Redis, SQL, sqlc, pgx, TypeORM

Realtime: WebSocket, MQTT, BLE, Event-driven architecture

AI / CV: YOLOv8, TensorFlow Lite, MediaPipe, AI API integration

Infrastructure: Linux, Docker, Nginx, PM2, Git, CI/CD concepts, VPS deployment

HOW I WORK

Understand the problem → design the system → build and ship it → watch how it behaves in production
→ improve it.
